

Concept Two: A Place to Learn

This scenario looks at opportunities to learn more about the natural environment and strategies for adapting our open spaces for climate change.

The brownfield site is rehabilitated through naturalization projects with research opportunities for meadow and forest regeneration. There are opportunities for learning more about Indigenous knowledge of ecosystems, and the plants, berries and trees the Mi'kmaw use for food, medicines and craft.

Weather observation equipment can gather local data. There's nature interpretation programming with an outdoor classroom and a trail system with interpretation to learn more about the different natural ecosystems on the site. Trails on half the site are designated for off-leash dog use. There is also an open field area for off-leash dogs.

Overview:

- 1 Park Entrance
- 2 Weather Equipment
- 3 Outdoor Classroom
- 4 Drop-off
- 5 Hilltop Lookoff
- 6 Pollinator Gardens
- 7 Meadow Plots
- 8 Forest Regeneration
- 9 Hiking/Snowshoe Trails
- 10 Dog Off-leash Trails (red)
- 11 Dog Off-leash Lawn
- Nature Info Panels
- P Parking Lot
