

DOWNTOWN DARTMOUTH

Combined Infrastructure Renewal Project

WHAT?

The integration of 6 infrastructure projects in Downtown Dartmouth

WHY?

Halifax Water will be constructing Phase II of the Sawmill Creek Storm Sewer Replacement Project in 2021. This creates an opportunity to transform this area into a multi-themed gateway, and to further daylight Sawmill Creek.

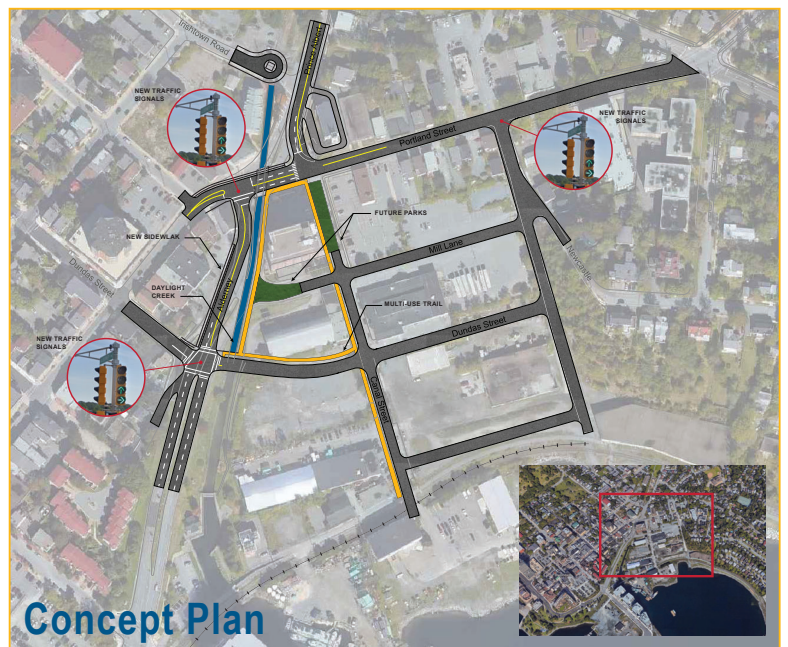

WHEN?

If the project gains support, HRM expects construction in 2020.

HOW?

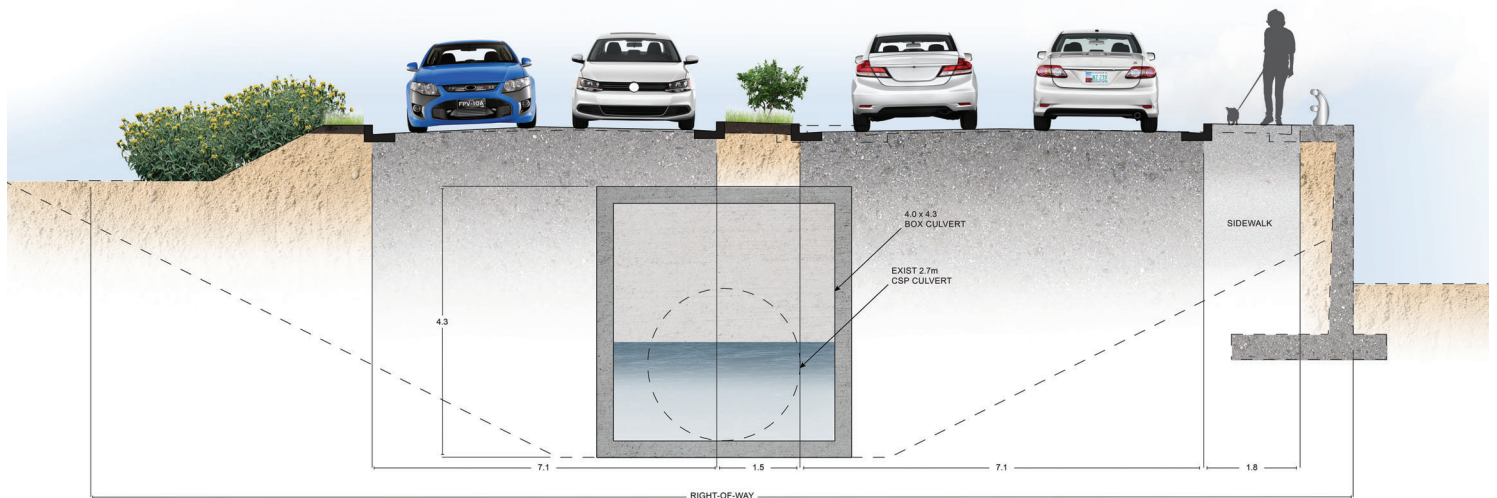

Working with Halifax Water, integrate and complete the following 6 projects:

- Sullivan's Pond Storm Sewer Replacement Phase II (Sawmill Creek)
- Portland Street at Alderney Drive Intersection Rehabilitation
- Canal Greenway Park Concept Plan
- Trans Canada Trail – Connection of Harbour Walk to Sullivan's Pond
- Pavement, Curb and Sidewalk Rehabilitation of Alderney Drive
- Dartmouth Cove Development and Infrastructure Renewal Plan (including Dundas Street Bridge)

Concept Plan

Current Section Planned

Concept Section—Alderney Drive

DUNDAS STREET TO PORTLAND STREET
