

SHAPE YOUR CITY

Intersections @ the Common

North Park Intersection Redesign

Public Spaces

How can we make North Park a great public street?

Step 1: An Aesthetic, landscaped space to move through.

The street corridor is a landscaped travel way through the Common with:

- Grassed boulevards and medians
- Continuation of the tree-lined avenues of Cunard and Cogswell Streets
- Planting beds and ornamental vegetation
- Decorative street lighting

Step 2: Add “People places” opportunities to stop, sit, and socialize

“People Places” enable the public life of our cities. They are the social spaces such as city streets, pedestrian plazas and parks where people socialize and interact with each other. They are places where people can enjoy being among people.

We would add amenities like defined seating areas, wider sidewalks, and pedestrian plazas that support social interactions.

Preferred Choice
From Public Engagements

Step 3: Add active gathering places for community events and celebrations

A gathering place is anywhere that people can congregate, to allow group interaction, whether for entertainment, informal recreation, or simply camaraderie in sharing an event.

We would add infrastructure and larger spaces to support bigger crowds and community events.
