

Project Overview/Timelines

What is happening?

- Detailed design plans have been developed for bus only lanes on Bayers Road in both directions between Romans Avenue and Windsor Street. The design includes a multi-use pathway on the south side of Bayers Road between Romans Avenue and George Dauphinee Avenue.

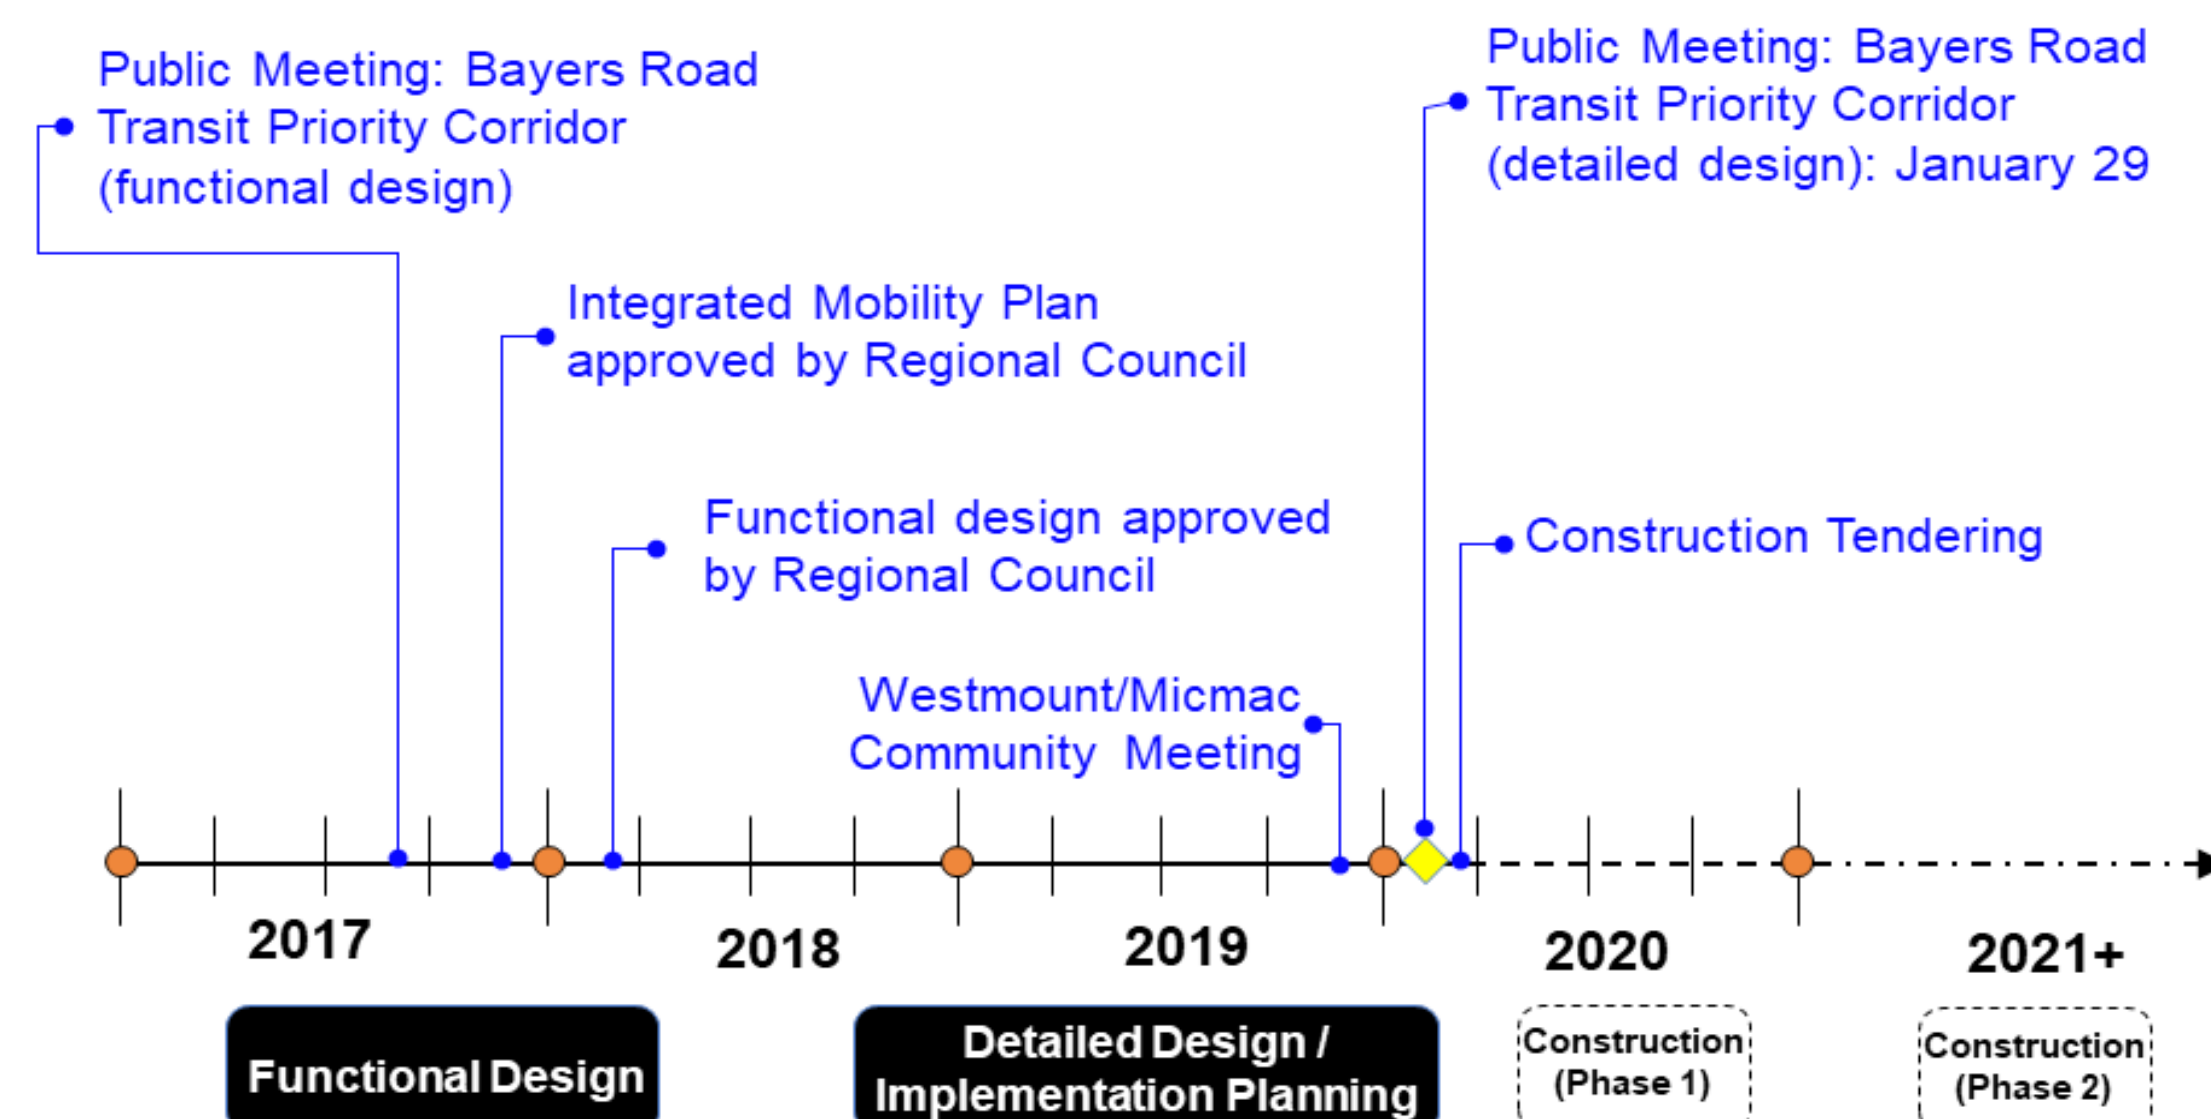

Why are these changes being made?

- To improve the reliability of Halifax Transit. Peak period traffic congestion on Bayers Road significantly impacts the travel time and reliability of bus routes travelling through the area. The addition of dedicated bus lanes will allow buses to bypass traffic congestion.
- To add a key active transportation connection that will improve walking and cycling for people of all ages and abilities.

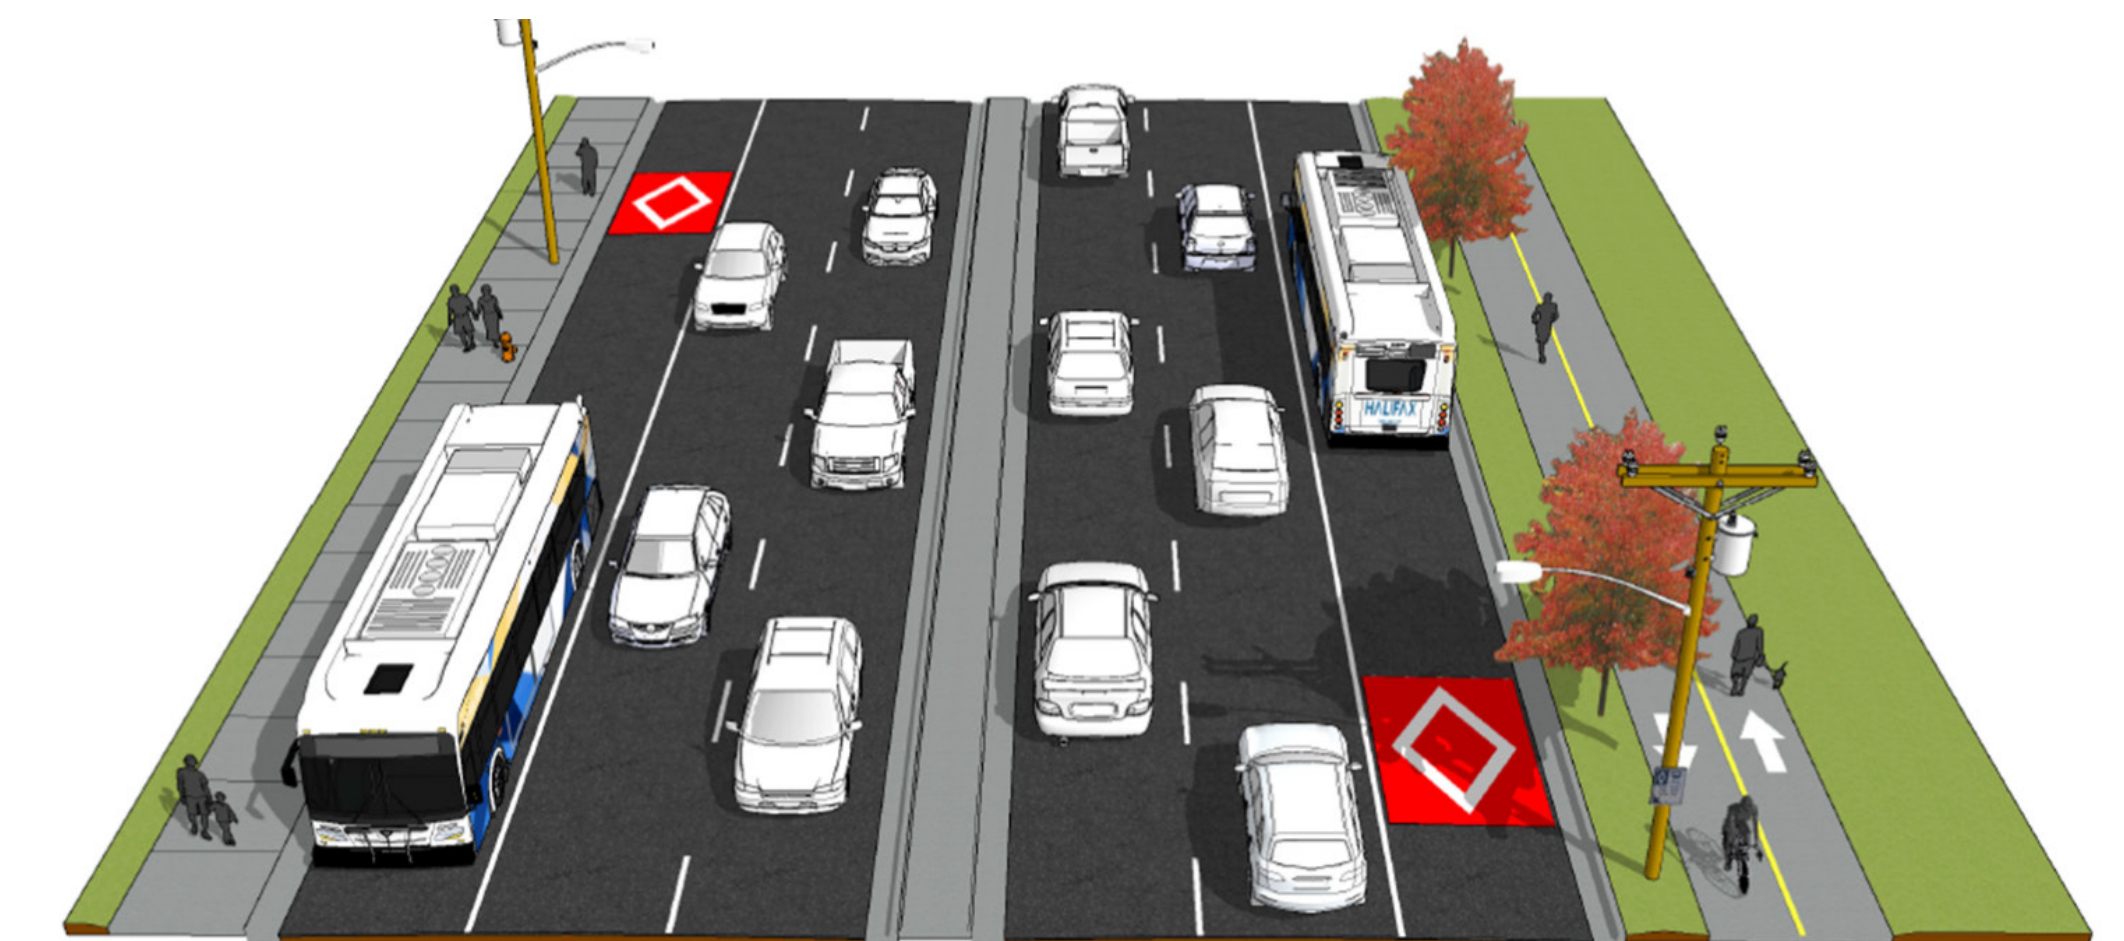

When will changes happen?

- Detailed design work will be complete in early 2020.
- The project is being split into two phases for construction:
 - » Phase 1 (Romans Avenue to Connaught Avenue) and
 - » Phase 2 (Connaught Avenue to Windsor Street).
- Tendering and construction for Phase 1 are scheduled for 2020. Phase 2 construction is tentatively scheduled for 2021.

Key Project Milestones

Existing Conditions - Bayers Road approaching Romans Avenue

Proposed Conditions - Romans Avenue to Halifax Shopping Centre
