

Midnight Run Park

The primary intent for Midnight Run Park is to provide a range of active recreation facilities located together in a central location in the community.

Site Suitability and Park Development Considerations

- The size of the park and relatively flat terrain make it suitable for playing fields such as soccer fields or ball diamonds.
- Proximity to the highway exit provides easier navigation for visiting teams in recreational league sports.
- Recreation facilities, such as sport courts and playgrounds, should be located on higher ground and away from the lower, wetter areas in the southwest corner of the park.
- Co-locating recreation facilities in one park can create a gathering place to meet neighbours.

What We Heard

- The most preferred amenities are sport courts followed by playing fields and a playground.
- About 1 in 5 respondents said Midnight Run is the park they would visit most often.
- A larger playground would allow more children to play together. More respondents prefer Midnight Run Park than McCabe Lake Drive Park for the location of a playground.
- The majority of respondents feel that a high level of park development for active recreation is the most appropriate at Midnight Run Park.

Considering the potential park development, what amenities would you like to see at Midnight Run Park? Select all that apply:
