

Downtown Halifax 5-Year Review

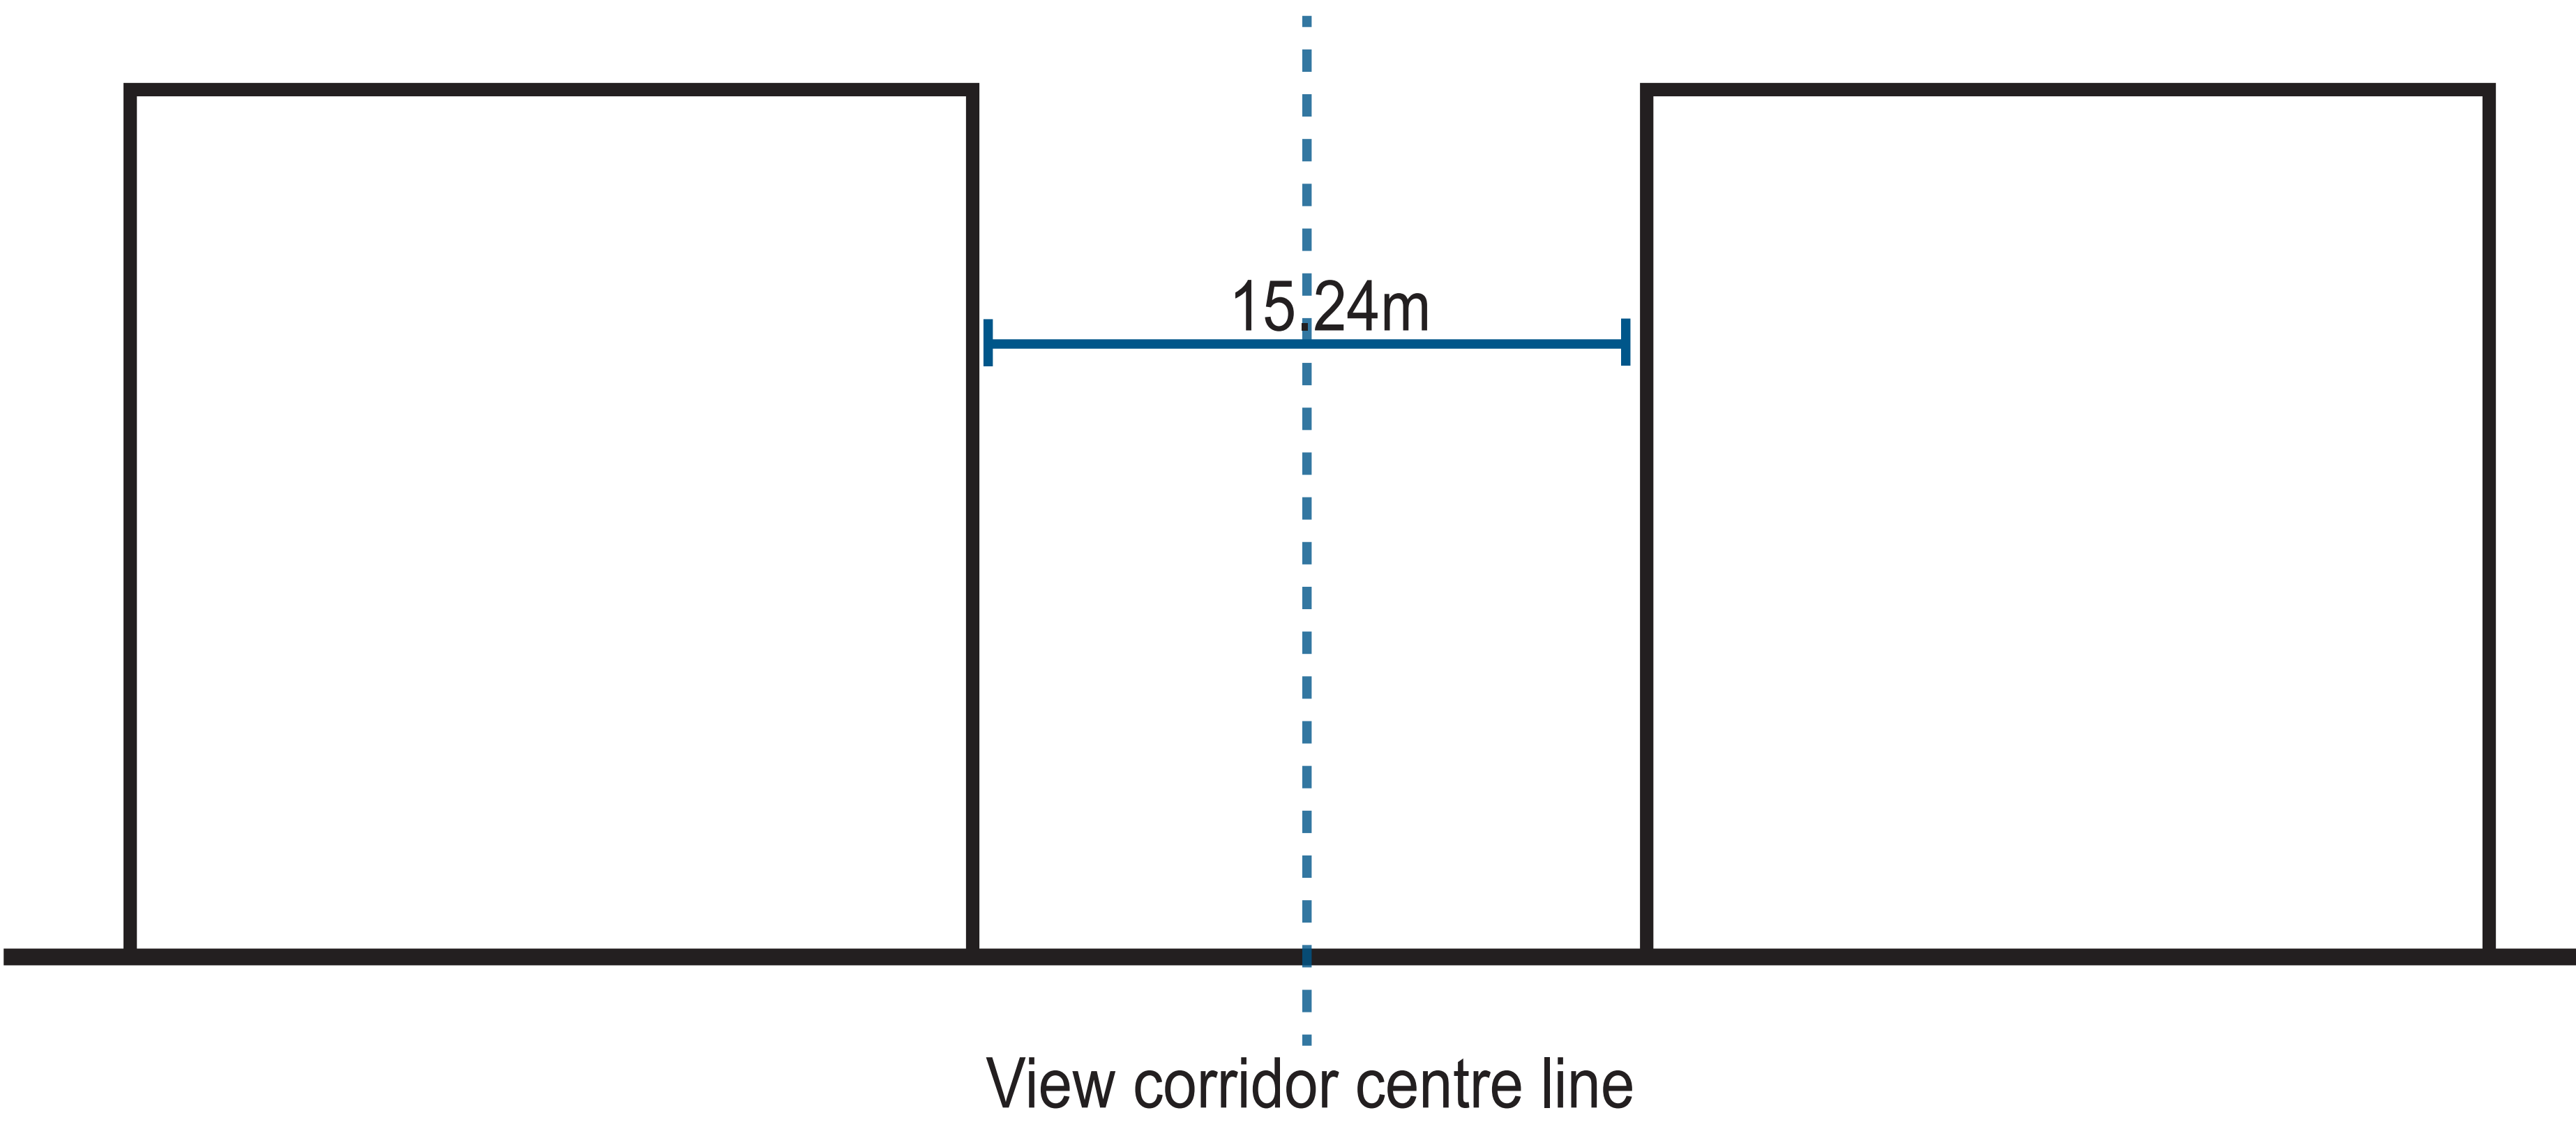

PROPOSED BY-LAW AMENDMENTS

Waterfront View Corridors

- Waterfront view corridors will be surveyed and mapped.
- New built form requirements will be developed to treat the corridors in a similar fashion that we treat streets.
- More flexibility with the uses that can be established on the ground floor abutting a corridor.
- Conflicts with interior lot lines will be specifically addressed. No additional setback from the interior lot line will be required above and beyond what is needed to satisfy the minimum required setback from the mean centre line of the waterfront view corridor.

Waterfront View Corridors (Current)

Waterfront View Corridors (Proposed)
